

PACER Plus

Committee on Trade in Goods,
Rules of Origin & Customs Procedures

CTG.04/D.02

Agenda Item 3: New Transposed Product Specific Rules (PSR)

1. Purpose

- 1.1 To present the outcome of PSR Transposition workshop for the Committee's consideration and decision.

2. Background

- 2.1 Harmonised System (HS) Nomenclature 2022 came into effect on 1 January 2022. The accepted amendments include 351 sets of amendments. It took Pacific countries two years to implement HS 2017 when it came into force. To date only Australia, New Zealand, Niue, Solomon Islands and Vanuatu of the PACER Plus Countries have implemented HS 2022. The remaining countries of Cook Islands, Kiribati, Samoa, Tonga and Tuvalu are still undergoing their internal approval processes with a target of completion by December 2023.
- 2.2 From a through analyses of the HS Transposition from HS2017 to HS2022, it was agreed that only 47 sub-headings (HS 6-digit level) required further discussions, analysis and agreement of the PSRs to be used.
- 2.3 The PSR Transposition workshop attended by all Parties to PACER Plus was held on 27-30 November with the objective of discussing and finalising the PSRs for the Committee's consideration and decision.

3. Outcome of the PSR Transposition Workshop held on 27-30 November 2023

- 3.1 For the information of the Committee, Annex 1 presents the outcomes and the new Product Specific Rules of Origin which transpired from the workshop.

4. Recommendations

- 4.1 It is recommended that the Committee on Trade in Goods, Rules of Origin and Customs Procedures:

1	Endorse the new Product Specific Rules of Origin	Yes
2	Recommend that this meeting paper be declassified for public release	Yes

PACER Plus Implementation Unit
1 December 2023

Annex 1: Outcomes of the PSR Workshop

Annex 3-B

Schedule of Product Specific Rules

1. For the purpose of interpreting the Product Specific Rules set forth in this Annex:
 - a) **Chapter** means a chapter of the Harmonized System (the first two digits of the tariff classification number under the Harmonized System 2022);
 - b) **Heading** means a heading of the Harmonized System (the first four digits in the tariff classification number under the Harmonized System 2022); and
 - c) **Subheading** means a subheading of the Harmonized System (the first six digits in the tariff classification number under the Harmonized System 2022).
2. This Annex is set out as follows:
 - (a) **Column 1** – Tariff item (2-digit or 4-digit)
 - (b) **Column 2** – Tariff subheading (6-digit)
 - (c) **Column 3** – Applicable change in tariff classification rule
 - (d) **Column 4** – Applicable regional value content rule
 - (e) **Column 5** – Applicable process rule
3. The Product Specific Rule or set of Product Specific Rules that applies to a particular chapter (2-digit code), heading (4-digit code) or subheading (6-digit code) is set out immediately adjacent to the chapter, heading or subheading.
4. For the purposes of this Annex:

“**CC**” means that all non-originating materials used in the production of the good have undergone a change in tariff classification at the 2-digit level;

“**CTH**” means that all non-originating materials used in the production of the good have undergone a change in tariff classification at the 4-digit level;

“**CTSH**” means that all non-originating materials used in the production of the good have undergone a change in tariff classification at the 6-digit level;

“**RVC (40)**” means that the good must have a regional value content of not less than 40 per cent as calculated under Article 4.
5. Where a range of Product Specific Rules are provided for a good, origin may be claimed on the basis that at least one of the Product Specific Rules is satisfied.
6. Where a Product Specific Rule requires a regional value content, origin may be claimed only if the final process of production is performed within a Party.

7. Where a Product Specific Rule requires a change in tariff classification or a specific process, the requirement applies only to non-originating materials, and the specific process must take place within the territory of one or more Parties. For example, the process “smoking, drying or production of flours, meals or pellets”, means that origin may be claimed only if all non-originating material used in the production of the good has undergone the processes of smoking, drying or production of flours, meals or pellets within one or more of the Parties. The Annex may include definitions of some processes.
8. Where a Product Specific Rule requires a change in tariff classification that excludes a change from other specified tariff classifications, the exclusion applies only to non-originating materials.
9. Section notes within this Annex apply to all chapters, headings or subheadings within the indicated section unless a specific exclusion is indicated.
10. Chapter notes within this Annex apply to all headings or subheadings within the indicated chapter unless a specific exclusion is indicated.
11. Heading notes within this Annex apply to all subheadings within the indicated heading unless a specific exclusion is indicated.
12. Reclassification of a good which does not undergo any transformation within a Party will not, in itself, confer origin to that good.
13. Product-specific rules:

<u>Chapter note for chapter 27:</u> <u>Chemical Reaction Origin Rule:</u> <p>For the purposes of this chapter, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds; or by altering the spatial arrangement of atoms in a molecule.</p> <p>The following are not considered to be chemical reactions for the purposes of this definition:</p> <ul style="list-style-type: none"> (a) dissolving in water or other solvents; (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization. 				

HS2 / HS4	HS6	Option 1 (CTC)	Option 2 (RVC)	Option 3 (process rule)
<u>Heading note for heading 2710:</u> Atmospheric Distillation and Vacuum Distillation Origin Rules For the purposes of Heading 2710, the following processes confer origin: (a) atmospheric distillation – a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapor then condensed into different liquefied fractions. Liquefied petroleum gas, naptha, gasoline, kerosene, diesel/heating oil, light gas oils, and lubricating oil are produced from petroleum distillation; and (b) vacuum distillation – distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries, gas oils may be further processed into lubricating oils.				
Section VI: Products of the chemical or allied industries				
Chapters 28 to 40				
<u>Chapter note for chapters 28 to 40:</u> <u>Chemical Reaction Origin Rule:</u> Any good of Chapters 28 to 40 that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in the territory of the Parties. For the purposes of this section, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of the molecule. The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good: (a) dissolving in water or other solvents; (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization. <u>Purification Origin Rule:</u> For the purposes of Chapters 28 – 35 and 38, purification is considered to be origin conferring provided that one of the following criteria is satisfied: (a) purification of a good resulting in the elimination of 80 per cent based of the content of existing impurities; or (b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:				

HS2 / HS4	HS6	Option 1 (CTC)	Option 2 (RVC)	Option 3 (process rule)
<p>(i) pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;</p> <p>(ii) chemical products and reagents for analytical, diagnostic or laboratory uses;</p> <p>(iii) elements and components for use in micro-elements;</p> <p>(iv) specialized optical uses;</p> <p>(v) non toxic uses for health and safety;</p> <p>(vi) biotechnical use;</p> <p>(vii) carriers used in a separation process; or</p> <p>(viii) nuclear grade uses.</p> <p><u>Mixtures and Blends Origin Rule:</u></p> <p>For the purposes of Chapters 30, 31, 39 and 40, Headings 3302, 3506, 3507, 3707 and 3822, Subheading 3502.20, the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is considered to be origin conferring.</p> <p><u>Change in Particle Size Origin Rule:</u></p> <p>For the purposes of Chapters 30, 31, 33 and 39, and heading 3822, the deliberate and controlled modification in particle size of a good, other than by merely crushing (or pressing) resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.</p> <p><u>Standards Materials Origin Rule:</u></p> <p>For the purposes of Chapters 28 – 32, 35 and 38, the production of standards materials is considered to be origin conferring.</p> <p>For the purposes of this rule "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer.</p> <p><u>Isomer Separation Origin Rule:</u></p> <p>For the purposes of Chapters 28 – 32, 35 and 39, and heading 3822, the isolation or separation of isomers from mixtures of isomers is to be considered origin conferring.</p>
